

Gonzalo Carracedo is a Full Professor at the Department of Optometry and Vision, Complutense University of Madrid (Spain), where he leads a research group focused on contact lenses, myopia control, ocular surface and sports optometry. He has authored over 130 peer-reviewed publications indexed in PubMed, covering topics such as orthokeratology, dry eye, meibomian gland dysfunction, ocular drug delivery and visual performance. He is also involved in the development of technology-based solutions for eye care through his work with the spin off Ocupharm Diagnostics. He regularly lectures at international conferences and collaborates with clinical and industry partners to translate research into clinical practice.
